EXPERIENCE

Dahlia
Remote

Frontend Developer Intern   *(December 2023 - January 2024)*

- Led the creation of an MVP for a personalized matchmaking platform, created dashboard for the app from scratch and actively resolved bugs to significantly improve the user experience.
- Collaborated closely with the team to enhance frontend and elevate user interface aesthetics.
- Managed tasks using Jira and streamlined documentation with Confluence.
- Accumulated expertise in agile development best practices for optimal project execution.

BTST Solutions
Remote

Frontend Developer Intern   *(October 2023 - December 2023)*

- Implemented the Atomic Design methodology to the project structure by designing atoms and molecules, leading to a highly efficient design system that notably improved user experiences.
- Developed numerous components with Tailwind, ensuring a consistent and polished user interface
- Leveraged Storybook to efficiently develop and maintain scalable UI components, Implemented Husky and Prettier for automated code formatting, ensuring a well-structured code standard.

HAPPYLIEVER
Remote

Web Developer Mentee   *(July 2023)*

- Created several reusable UI components and mentored by senior developers to build a chatbot using React Chatbot-Kit and Redux for streamlined user interactions.

PROJECTS

BOOKSTORE - MongoDB, Express, Node.js, React.js, Axios, *Github*   *(August 2023 - September2023)*

- Developed a mern-stack bookstore website, deployed on Vercel, featuring CRUD operations, enabling users to seamlessly manage a collection of books, including adding, editing, and deleting entries.

LinkedIn Clone- React.js, Redux, Firebase, *Github*   *(April 2023 - May2023)*

- Implemented Redux for global state management and utilized Firebase for authentication and post functionality in a LinkedIn-replica app, enabling seamless registration, login, and post functionality.

Personal Portfolio - Next.js, TypeScript, Sanity, Tailwind, Vercel, Framer *Github*   *(June 2023)*

- Built a webpage using Next.js SSR, integrating Sanity.io as a CMS for showcasing skills and experiences.

ACCOMPLISHMENTS

Hacktoberfest 2023: Successfully raised 4 (+more) pull requests that got merged within October.

Hanko Hacksquad Hackathon: Developed an Image Gallery app with Next.js and Hanko authentication and integrated Supabase as backend database.

Appwrite Hashnode Hackathon: Built a Todo app using Appwrite as a backend and published a blog.
